The Altus Difference

Made in Grand Rapids, Michigan

Durability

Less than 0.5% of our carts have required service fixes since beginning tracking

- Many of our carts are still in service after 10+ years!
- We build carts that last much longer than the average 5-year lifecycle of other workstations. This provides customers with the best return on their investment.
- Altus' mobile and wall-mounted workstations are engineered with solid yet lightweight cast aluminum and steel
- Our work surfaces have sturdy non-porous surfaces that are able to withstand even the harshest cleaning agents.

Customization

Customize Your Workstation with Multiple Configurations, Accessories, and Colors

Color Portfolio

Studies have shown that color can promote healing and make patients happier. Altus offers a portfolio of six different color options.

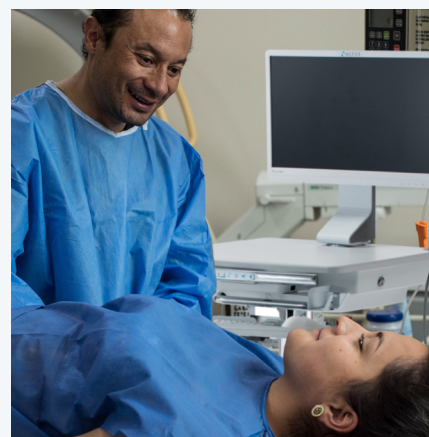

Configurations & Accessories

From baskets, to power cords, to lockable medication drawers - we have what you need to maximize your workflow!

Engineering

From concept drawings to prototype, our product development and engineering teams will work with you to bring your idea to life.

Ergonomics

- Easily move from sitting to standing with Altus' Proprietary Ascend lift technology
 - Manual lift offers 18" of height adjustment.
 - Ascend electric lift technology allows you height adjust with the push of a button!
- Effortlessly tilt and adjust monitors to fit each clinician
- Large worksurfaces to give clinicians the room they need
- Smooth pull-out adjustment keyboard and intuitive $\pm 20^\circ$ tilt with soft palm support

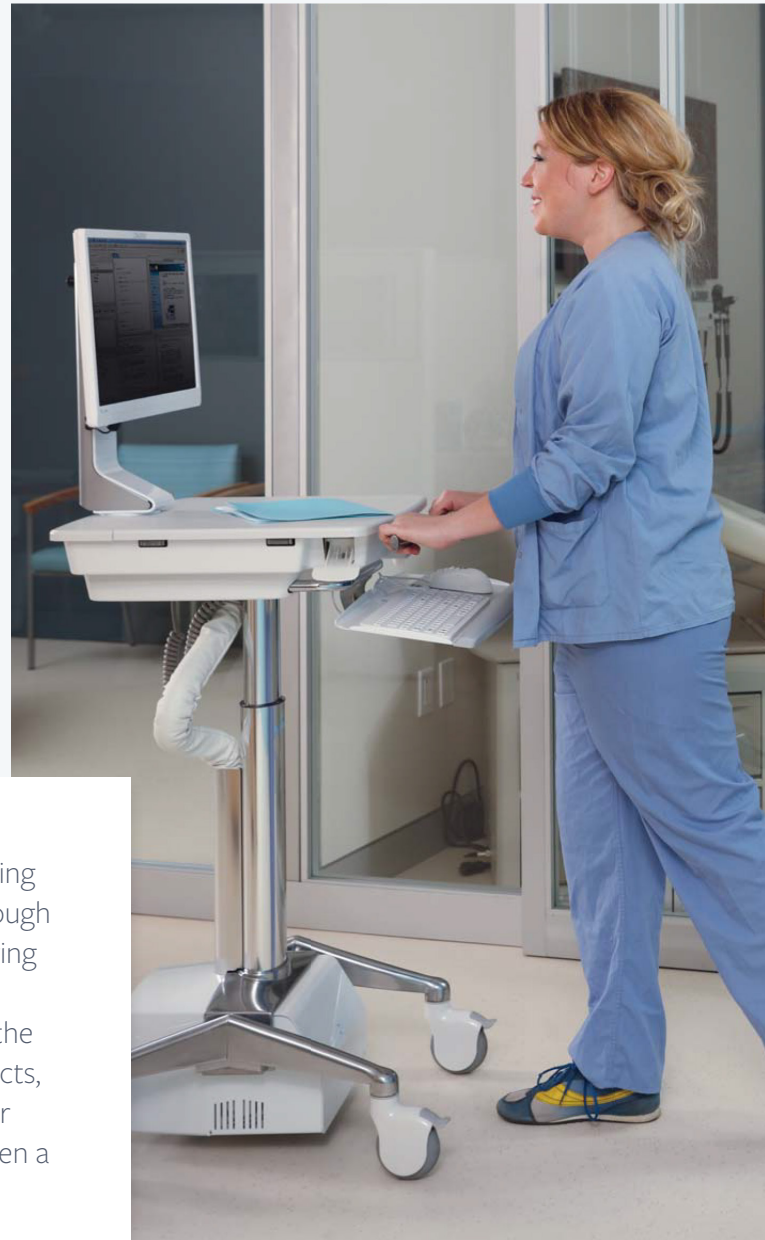

Intuitive, well-designed, powered carts

Clio considers the ergonomic and human factors to adjust to each unique clinician, with the safest battery available. Happy clinicians make happy patients!

Highly Mobile

- Small, 18.5" wide footprint for ease of movement and the ability to squeeze into tight places
- Our LCD monitor mounts swivel 350 degrees allowing you to work with patients or move the monitor for easy cart mobility without tangling cords
- One of the lightest powered carts on the market

"Altus helped us through a very challenging project with unique requirements and tough timeframes. Their commitment to ensuring we had what we needed and when we needed it, was critical to the success of the project. Our employees love their products, and when we need their help, Altus never fails to rise to the occasion. Altus has been a great partner to our organization."

Introducing the ClioAir: 20% lighter, 3 times easier to roll.

ClioAir

The ClioAir is designed with the same powerful features as Clio, just built incredibly lightweight.

It utilizes LifePO₄, the safest, long-lasting battery technology on the market. ClioAir features 18" of sit-to-stand height adjustment, a one-piece design keyboard with a breakaway hinge, and secure technology storage. The sleek design is created from die-cast aluminum, for constant years of use. And with enough battery life to last an entire shift, our newest Clio is your perfectly mobile, always there for you workstation.

Altus provides best-in-class secure medication delivery with ClioMed

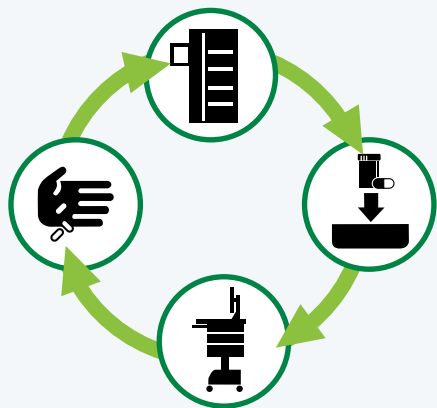

ClioMed: Medication Delivery Cart

Coupled with unsurpassed security and an intuitive design, Altus' medication delivery solution ClioMed will improve clinician workflow and better the patient experience.

- **Reduce Errors:** Point of care medication administration eliminates wait time and errors.
- **Ergonomic Workstation:** This true sit-to-stand design allows clinicians to access each of the fully visible 6 bins with limited to no bending. Bins are removable and reconfigurable. The cart's lightweight design removes additional strain on clinicians' bodies.
- **Improve Workflows:** Reduce time clinicians spend retrieving supplies by gathering patients' medication in the beginning of each shift.
- **Work Smart and Secure:** Easily view and access patient medication within electronically labeled drawers. Categorize by patient name, room number or supply type. Medication is individually locked and all drawer access can be monitored from an admin account at the cart or from the Central Management Software.

Ascend® EL Sit-to-Stand Electric Lift Technology

Promote clinician wellness and productivity

- Providing 16" of sit-to-stand height adjustability, Ascend EL is a one touch adjustment, with a soft start/stop.
- **Powerful:** Altus' Ascend Electric Lift is 52% stronger than competition.
- Total max dynamic load of 270 lbs.vs.178lbs. from leading competitor electric lifts.
- **Reliable:** With its simplistic design, break/fix issues are eliminated and encompasses an expected life of 10,000 full up/down cycles.

Central Management Software (CMS)

“Our organization has purchased and deployed more than 400 Altus carts over the span of 7 years. As a testament to their durability, all of these carts remain in production today! Product and service is fantastic and continues to exceed our expectations.”

Troy Durepo

Business Systems Analyst,
Project Coordinator

The most durable non-powered mobile workstations in the market

Altus' non-powered carts are the cornerstone of our mobile technology workstation family. Our H-class non-powered technology workstations allow for seamless technology accessibility while integrating into multiple workflows.

Effortlessly move through your daily tasks with our lightweight and ergonomic carts. Altus re-establishes the standard for workstations with our entire line of powered and non-powered carts.

Simple. Secure. Connect.

Cameo

Simple. Secure. Connect. Introducing the first product in the new Cameo line. The P2 is our Virtual Visitor cart (with powered USB ports!) to help connect patients in hospitals with their families and caregivers. Works for a wide range of teleconferencing or telemedicine capabilities.

Compact Footprint

Space is incredibly valuable in healthcare environments. Multiple clinicians' required in a room, a large amount of family surrounding a patient or numerous types of equipment can all lead to tight quarters. Our compact footprint is so important for both functionality and satisfaction.

Clinician Focused

Promoting healthy work habits and delivering care efficiently and effectively is essential within each hospital setting. Happy clinicians make happy patients!

Patient-Centered

Help your patients stay connected with their family, friends, and clinicians

Altus' Reach is an affordable, durable, yet sleek, wall mounted EMR workstation

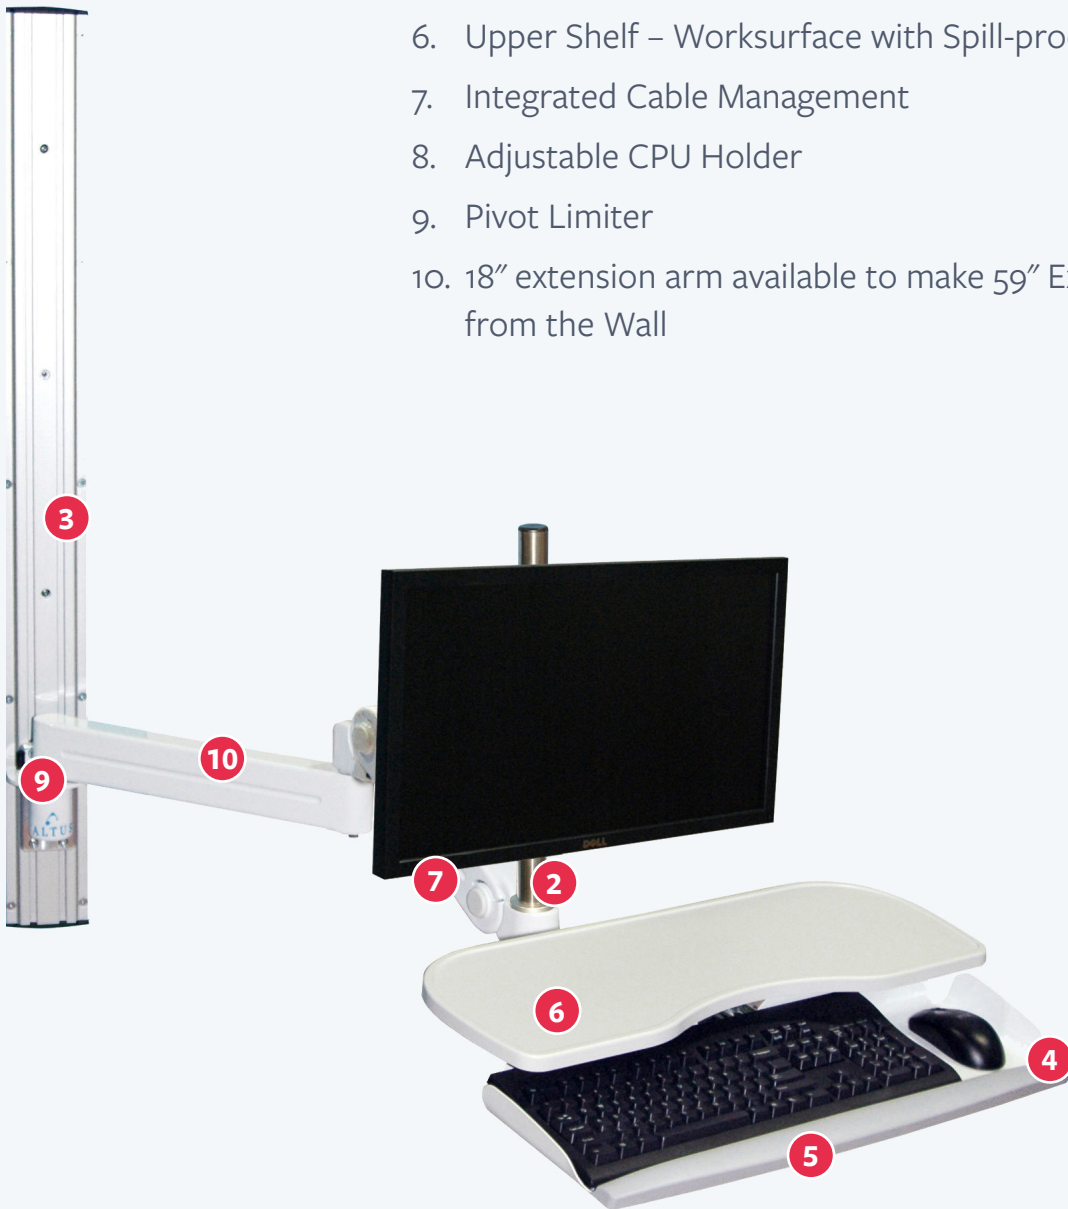

Tight on space? Our wall-mounted workstations are built to compactly fold against the wall when not needed. Our wall-mounted workstations allow the caregiver to sit or stand beside the patient and easily share information. The ability to swivel and rotate the workstation not only creates a healthy work environment for the caregiver, but also gives the patient a stress-free visit.
